Available: 11 January – 30 April 2027

SUMMARY

Interested in data analytics and public policy, with hands-on experience cleaning government open data using Python and Pandas, querying databases with SQL, and building dashboards with Excel and Power BI. Keen to use data to support business decisions, understand social issues, and inform policy.

EDUCATION

Bachelor of Arts (Information Studies) - Year 4 — AUG 2023 - Present

Srinakharinwirot University - Current GPA: 3.81

- Relevant Coursework: Data Analysis, Data-Driven Digital Organization, Web Development, Database Management, Management of Information Organization and Intellectual capital, Intellectual Property and Cyber Security

SELECTED PROJECTS

Bangkok Road Accident Analysis (2019–2025) — Oct–Nov 2025 · Updated Sep 2026

Academic Project — Independently Expanded | Python, Pandas, Excel, Power BI

- Expanded a university project using Ministry of Transport open data from 2019–2025, cleaning and standardizing Bangkok accident records with Python and Pandas.
- Built an interactive Power BI dashboard to explore accident patterns over time, locations, and reported severity.
- Earlier version (2022–2025): Experimented with time-series forecasting using Prophet in Python.

Bangkok Public Transport Ridership Analysis & Dashboard — OCT 2026

Personal Project | Python, Pandas, Excel, SQL, Power BI

- Cleaned and prepared public transport ridership data using Excel and Python. Used SQL to aggregate ridership by year, month, and service.
- built an interactive Power BI dashboard to compare bus and rail trends and explore service-level patterns.

EduForward — Education Policy Digital Library — APR 2026

Academic Project | HTML, Tailwind CSS, JavaScript

- Curated and organized academic resources on education policy, reform, and inequality into a digital library.
- Contributed to website development with search and filtering by topic, publication year, and resource type to support access to relevant research.

Children's Literature Thesis Archive & Dashboard — SEP 2025 - OCT 2025

Project for the Children's Literature Department | HTML, CSS, WordPress, MySQL, Power BI

- Created a digital archive database for children's literature theses to improve accessibility for students.
- Built a Power BI dashboard to visualize thesis topics and publication trends over time.

Healthy Lifestyle in Bangkok — Urban Policy Feature — DEC 2024

Academic Writing Project | Desk Research, Data Storytelling

- Synthesized published statistics and reports to explore unequal access to exercise facilities and green spaces in Bangkok.
- Produced an illustrated feature connecting urban accessibility issues with public policy initiatives and opportunities for improvement.

CERTIFICATIONS

- **Data Analysis with Python - IBM**
- **Building Web Applications in PHP - University of Michigan**

TECHNICAL SKILLS

- **Data Analysis & Visualization:** Python (Pandas), Excel, Power BI
- **Databases:** SQL, MySQL
- **Time-Series Forecasting:** Basic experience with Prophet
- **Basic Machine learning model:** Python (Scikit-learn, Pandas, NumPy, Matplotlib)
- **Web Development:** HTML, CSS, JavaScript, PHP, WordPress
